

SDG data flows and global reporting: The Asia-Pacific experience

# SDG Implementation in China

National Bureau of Statistics of China

18th October 2018

I. SDG implementation in China

II. NBS work on SDG

III. The preparation for SDG data reporting

IV. Challenges and Next step

## I. SDG Implementation in China

- Declare the support in the first round national voluntary statement
- Establish domestic inter-agency coordination mechanism
  - a. Comprises more than 40 line ministries
  - b. Responsible line ministries adjusting is in progress
- Formulate National Plan on Implementation of the 2030 Agenda
- Release China's Progress Report on Implementation of the 2030 Agenda for Sustainable Development

## I. SDG Implementation in China

- Integrate the Agenda into domestic mid-and-long term development strategies:
  - a. 13th Five-year Plan
  - b. The Plan for Health China 2030
  - c. The Plan of China Education Modernization 2030
  - d. Biodiversity Conservation Strategy and Action Plan in China
  - f. 13th Five-Year Plan for Poverty Eradication

## I. SDG Implementation in China

- Set up 3 sustainable development innovation demonstration zones on different subjects:
  - a. Transformation of resource-based city
  - b. Sustainable utilization of landscape resource
  - c. Innovative development of megacity

## II. NBS work on SDG

- Establish a specialized working group on SDG implementation
- Participate in the consultation on SDG global indicator framework and the work of the IAEF-SDGs working group
- Conduct professional training to strengthen statistical capability of NBS and the surrounding countries and regions
- Hold or attend national and international conferences regarding the 2030 Agenda

### III. The preparation for SDG data reporting in NBS

- Translated the metadata information of SDG indicators, including definitions, calculation methods
- Assessment the data availability and confirm respective data provider of SDG indicators
  - a. Around 20% indicators produced by NBS
  - b. The second round consulting on each indicators' data provider is in progress

## IV. Challenges and Next step

### **Global SDG monitoring: major challenges in China**

- The built of data reporting mechanism
- The gap between the monitoring requirement and statistical capacity
- The connection for the national indicators to the global monitoring indicators

## IV. Challenges and Next step

### **Global SDG monitoring: next step in NBS**

- Provide better technical support in terms of the research on indicators, methods, standards
- Engage in the statistical capacity building
- Participate in the implementation of the global indicator framework
- Feedback to relevant domestic ministries about the SDG ongoing work
