

# Sendai Framework Monitor: Gaps and Current Needs

---

## Gaps

- Depth of annual member state reporting is mixed (*Targets A,B,E - OK*)
- 26 Countries in Asia Pacific reported some data online (67%)
  - 20 in Asia and 6 in Pacific (*capacity issues among SIDS*)
- Gaps in data collection (*not all data needed is collected or reported*)
- SADD Data reporting globally is limited

## Needs to:

- Support coordination in Government system of SFM data needed
- Support collection of SADD data (*advocacy is only one part*)
- Encourage use of partner and NGO data (*e.g. SADD*)
- Increase data sharing and coordination within Government (*all levels*)
- Strengthen NSO and NDMO linkages and with NDRSF
