## GIZ – Partner Worldwide

- Provision of services worldwide in the field of international cooperation for sustainable development
- Over 50 years of experience in a wide variety of areas
- 2015 business volume exceeded 2.1 billion Euros
- 17,319 staff in over 130 countries
- Main commissioning party: Federal Ministry for Economic Cooperation and Development (BMZ)

# Content

- 1. Introduction: Agricultural Trade, Standards, and Trade Facilitation**
- 2. GIZ Approaches: Practical Examples**
  - a. Standards in the South-East Asian Food Trade
  - b. Sustainable Agrifood Systems in the ASEAN Region
- 3. Conclusions for Northeast Asia and GTI**

## **Introduction: agricultural trade, standards, and trade facilitation**

- Constant increase over time
- Requirements: efficient transport and border processing procedures
  - Removing unnecessary, mostly administrative barriers to trade
- Risks: spoiled, contaminated or rotten foodstuffs can have serious consequences for the health of end users
  - Facilitating trade that guarantees food safety

**➔** Development of country specific standards and trade rules

**➔** Worldwide fragmented and non-harmonised food regulation

## **Introduction: agricultural trade, standards, and trade facilitation**

# Introduction: Country strategies for cooperation on agricultural standards and food safety

## Example 1: Standards in the South-East Asian Food Trade (SAFT)

**Commissioning Party:** German Federal Ministry for Economic Cooperation and Development (BMZ)

**Country:** ASEAN countries (with specific focus on Cambodia, Lao PDR, Myanmar, Indonesia, Philippines)

**Lead executing agency:** Association of Southeast Asian Nations (ASEAN)

**Overall term:** 2015 to 2017

**Website:** [www.asean-agrifood.org/projects/saft/](http://www.asean-agrifood.org/projects/saft/)

## Example 1: Standards in the South-East Asian Food Trade (SAFT)

- Low number of foods are certified in accordance with current standards for good agricultural practice
  - businesses and farmers lack information about the certification process
  - business institutions in ASEAN countries are failing to provide adequate support services
- ➔ Limits options for the export of produce to lucrative markets outside ASEAN (e.g. Japan, the European Union, USA)
- ➔ Hinders individual ASEAN countries to further integrate themselves into the ASEAN economic community

## Example 1: Standards in the South-East Asian Food Trade (SAFT)

### Objectives

Application of international or ASEAN-wide standards relating to good agricultural practice and specific quality features for food (e.g. organic farming methods) in ASEAN member states

### How?

Support the ASEAN Expert Working Group on ASEAN GAP and the Task Force on ASOA (ASEAN Standard on Organic Agriculture), which are the competent bodies within the sector to **harmonise national standards** with the existing regional ASEAN GAP and ASOA standards.

- Creating an **enabling environment** for the further development of standards in the food sector
- **Training** inspectors, auditors and state supervisory bodies
- **Supporting** farmers, producer groups and companies through PPP

### Results and Effects

- Alignment of quality standards in the ASEAN economic community with internationally recognised standards such as Global GAP and the EU's organic certification label.

## Example 2: Sustainable Agrifood Systems in the ASEAN Region (SAS)

**Commissioned by:** German Federal Ministry for Economic Cooperation and Development (BMZ)

**Country:** Member States of ASEAN; in particular Cambodia, Lao PDR, Myanmar, Viet Nam

**Lead executing agency:** ASEAN Secretariat

**Term:** 2013 to 2017

**Website:** [www.asean-agrifood.org/](http://www.asean-agrifood.org/)

## Example 2: Sustainable Agrifood Systems in the ASEAN Region (SAS)

- One of the most important engines of economic growth in the ASEAN region
- Increasing demand among consumers for high-quality foodstuffs is driving regional and national agricultural policies to focus on the concept of sustainability
- Ensuring safe, healthy and affordable food for a growing population requires the activities of all actors along various value chains
- Focus on **advancing the agrifood sector along entire value chains** in the rice, vegetable, fruit and perennial crops.

## Example 2: Sustainable Agrifood Systems in the ASEAN Region (SAS)

### Objectives

- Strategies and guidelines of ASEAN Member States for sustainable agrifood systems are implemented at national level.
- Harmonisation of national policies towards the ASEAN Economic Community (AEC)

### How?

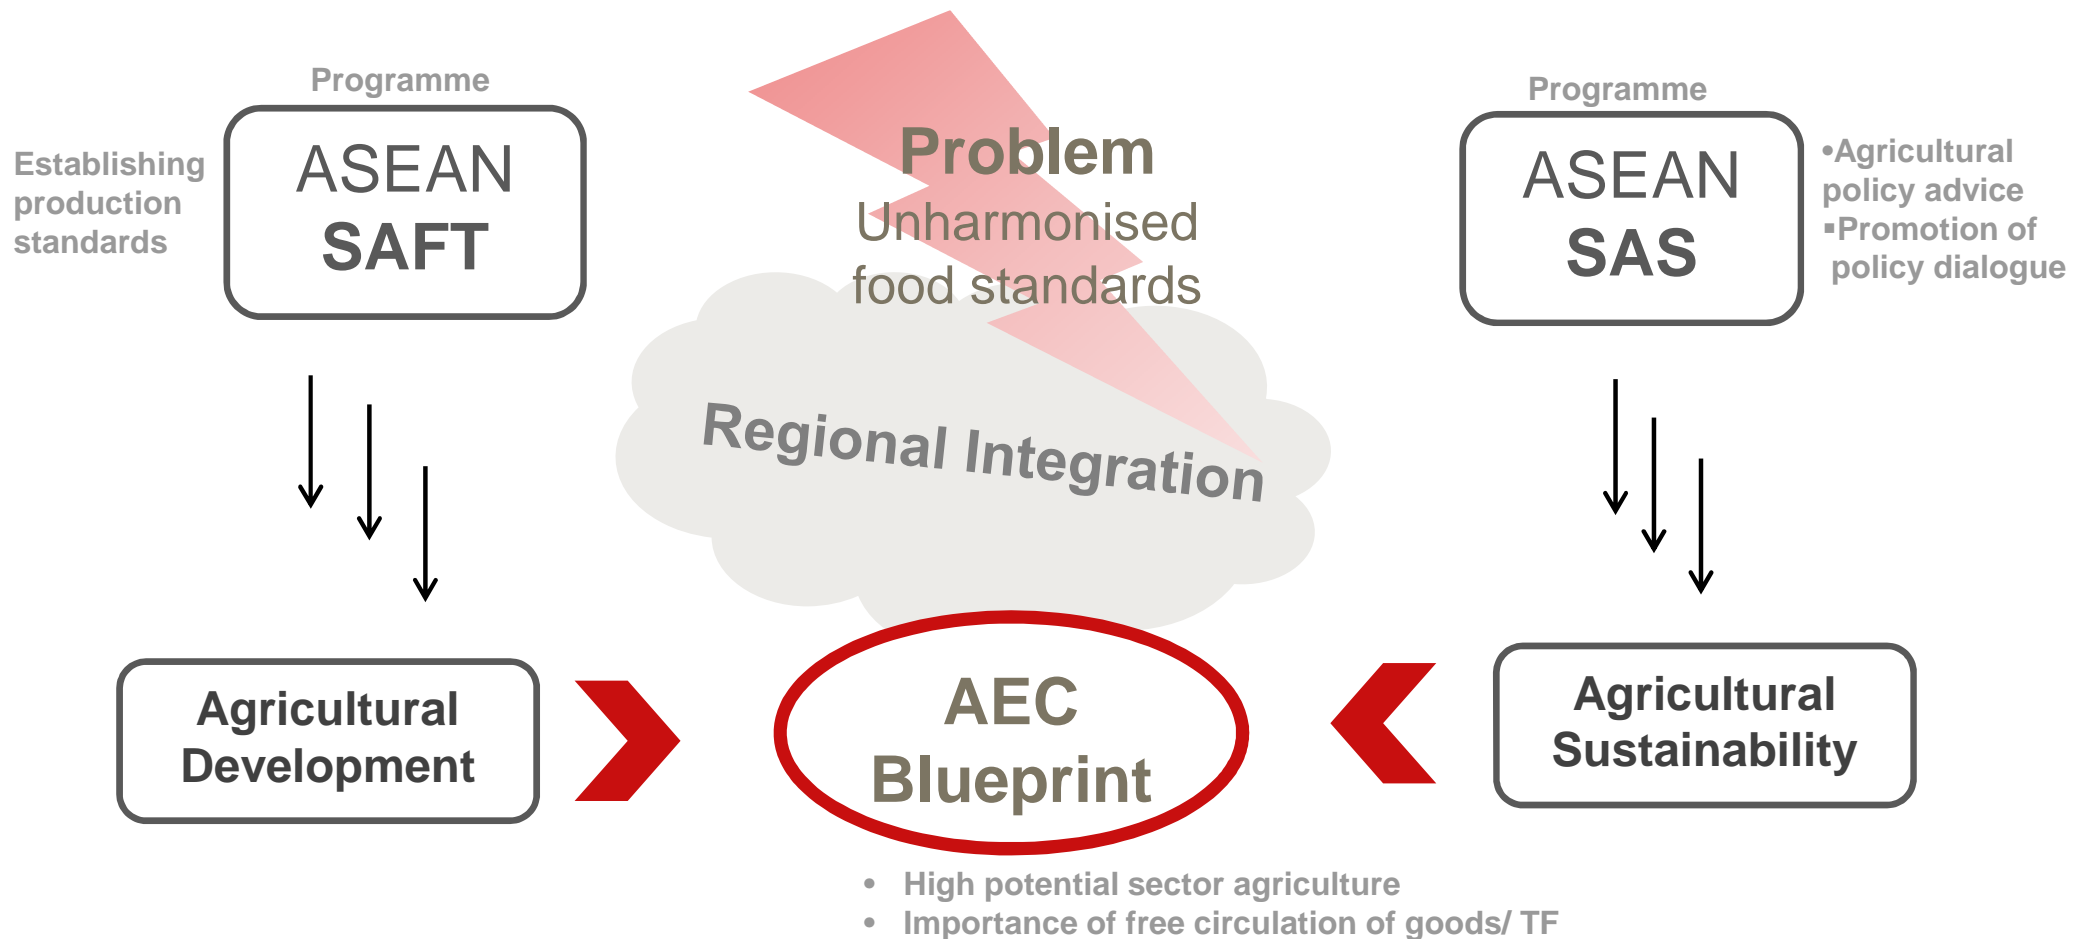

- **Policy Framework:** Advice for ASEAN Member States on policy-making and decision-making
- **Implementation of production technologies:** Selected approaches to sustainable production, based on biological control agents
- **Market linkages:** promotion of cooperation between smallholders and the private sector, sustainable agrifood models

### Results and Effects

- Official endorsement of Guidelines on the Regulation, Use and Trade of Biological Control Agents by the ASEAN Ministerial Meeting and selected implementation on a national level.
- Training of 500 ministerial staff and agricultural experts as well as more than 10,000 farming households in sustainable agricultural practices

## Conclusion: Standardisation and Regional Integration

## Conclusion: Standards and Regional Cooperation

### Challenge for regional cooperation

- Implementation gap, policy coordination, multi-stakeholder process

### GLZ approaches

- Ensuring food security and safety through standardisation, trade and regional cooperation
- Inclusive approach: promotion of cooperation between private sector and policy-makers on a national and regional level

## Conclusion: Standards and Regional Cooperation

### Implications for Greater Tumen Region

- Diversity of experiences and performance
- High potential for regional cooperation
- Existing regional best practices
- Institutional set-up and regional coordination mechanism
  - GTI Secretariat and Committees

 **Utilise these opportunities** to realise concrete projects with tangible results around common issues while ensuring private sector inclusion.
