Contents

- Background
- Idea: “Single Window” Reference Model. From Ideology to Implementation
- Follow-Up Steps
Request from society

Transition to paperless technologies

Trend - digital transformation of economy
Key Differences

**"SINGLE WINDOW" - TODAY**

**UN CEFACT Recommendation No. 33**

- Use of documents *(in paper or electronic form)*
- ICT use is not necessary
- Interaction in B2G, G2G segments only
- Single throughput channel

---

**"SINGLE WINDOW" - TOMORROW**

“Single Window“ in the digital environment

- Data usage.
  - Data conveyor
- Digital “end-to-end“ SMART technologies
- Interaction among all stakeholders in the commodity supply chain (B2B, B2G, G2G, S2S)
- Multiple entry points
Concept of “Single” Window and Reference Model

Recommendation No. 33
SEEC Decision No. 68

Implemented in Singapore, South Korea and other countries

SEEC Decision No. 19

Reference Model

Single window

+ B2B, coverage of financial, logistics services

Single window

Single window
Basic Idea

"SINGLE WINDOW“ REFERENCE MODEL:

- A model to manage data, processes, interaction and changes in the FEA regulation system
- Embedding into the digital economy
- A REFERENCE POINT for developing national SWs
FEA Management Model

Foreign economic activity ecosystem

B2B
- Trade
- Logistics
- Insurance
- Clearance
- Warehouse

B2G
- E-Customs
- Gov’t control
- Border management
- Accounting and auditing
- Permissions
- Payment for gov’t services

G2G
- Customs
- Min of Pub Health
- Min of the Ind
- Min of Culture
- Min of Agricul
- Min of the Int
- Min of Econ
- Min of Transp
- Tax Office

End-to-end business processes
Seamless data exchange
Shared data usage

B2B exchange

Data conveyor

State control
Commercial data package generated

Search for goods -> Contract Payment -> Route selection

B2B

Search for partners -> Transportation contract -> Transportation Insurance contract

B2G

Delivery -> Placement in warehouse -> Accounting

B2B

Formalities

Inventory and use of goods

Auditing

> 90% of information
Data analysis. Change Management, Risk Management
EIGC Decision “On Description of a Reference Model of the National “Single Window” Mechanism in the Foreign Economic Activity Regulation System” COMPRIZES THE BASIC:

- principles for designing and operating the national “Single Window“ mechanism
- description of functions and architecture of the reference model
- a list of State procedures and services
Follow-Up Steps: Moving from Idea to Implementation

- Creating legal environment
- Optimizing business processes
- Single Data Model
- ICT, mutual recognition mechanism, compatibility (interoperability) of “Single Windows"
Thank you for your attention!
