

SCHOOL FEEDING PROGRAM

- a happy future begins today!

Children

20%

**of today's
population**

100%

**of the future
of the planet**

Russian Federal Experimental Project on the Development of School Feeding 2007-2011, 44 regions, 1 858 schools, over 1 mln students

Share of children
eating in schools
increased by

15%

95%
primary
school children
(1-4 grade)
get hot food
at school

11%
of school kitchens
undergone major
reconstruction

20%
of schools were
re-equipped with
modern cooking
equipment

International experience of the Russian Federation
in the implementation of school feeding programmes

Armenia
Kyrgyzstan
Tajikistan

Tunisia
Morocco
Jordan

School feeding programmes - a single set of activities

*Every dollar invested in school meals provides in the future from 3 to 9 US dollars of economic benefits **

Monitoring and
Evaluation
Systems

Advocacy campaigns
to enhance public
awareness and promote
healthy feeding

Trainings on school
feeding organization
for different
stakeholders

School feeding programmes - healthy and intelligent generation

*Each additional school year spent by a child in a junior school increases his future income by 5%**

When children spend more time in school:

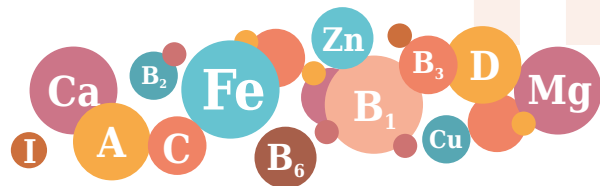

the level of attendance is growing and the drop-out rate is decreasing

their cognitive and mental abilities develop

With food, children get the micronutrients necessary for their healthy development, thanks to which:

they are less sick

they develop better

they have more strength and energy during the day

* UN WFP "How School Meals Contribute to the Sustainable Development Goals" Evidence paper, February 2017

School feeding programmes - guarantee a better future for local farmers

*Every \$ 100 spent on school feeding allows the family to save and invest in productive assets \$14.5 **

School food provides stable demand and a guaranteed market for agricultural products

Selling their crops to schools, farmers:

receive a stable income and raise the standard of living

can expand their production and plan its volumes

ensure the quality and safety of products

School feeding programmes - an imupls to the development of the state and economy
