

There are some ~~in~~ SDG indicators on impact of disasters.
No country is perfect on compiling National Accounts
compilation. Countries prepare National Accounts with many
difficulties due to various reasons such as lacking
proper data sources.

Until we come out with proper methodology to
compile ^{proper} statistics on impact of disasters on the
GDP I propose that we consider ~~to~~ ~~developing~~
proxy indicators, and share it among the
countries.

SiC bank is fully supportive of document listed
under agenda item 3(d).
