

Expert Working Group Meeting on Energy Connectivity

Republic of Tajikistan

UNCC, Bangkok
13 December 2017

Republic of Tajikistan

Five Major Challenges in promoting Cross Border Electricity Connectivity

- *The need for 500 kV cross border electricity transmission lines
- *Long process of coordination between the project member states (ex. CASA 1000 project)
- *Investment attraction (large investments)
- *Emergency Control Automatics issue coordination
- *Different standards and equipment

Concrete Examples and Good practices in addressing the challenges

- *Monitoring mechanisms (CASA 1000 Project)
- *Purchasing Board meetings on regular basis
- *Issue of different standards and equipment with Uzbekistan on connecting electricity transmission lines

Republic of Tajikistan

Role of regional cooperation in addressing the challenges.

- *Good platform for negotiations on ongoing and to be constructed energy related projects

- *Coordination on using unified standards at the process of project implementation

- *Maintenance of Regional Energy Security

- *Reliable and sustainable energy supply

- *Sustainable energy market and economic development

What should be the main building blocks in developing the regional roadmap.

- * Meetings between the decision makers of states

- * Coordination on adoption of unified standards in construction of power transmission lines

- *Development of unified mechanism in setting the price for energy

THANK YOU
