Anti-Dumping Agreement: Overview

By
Abhijit Das, Professor and Head
Centre for WTO Studies
IIFT, New Delhi

UNESACP – ITC Technical Capacity Building Workshop on
Afghanistan’s Accession to WTO
29 October 2013
Trade Remedies

- Anti-dumping
- Countervailing
- Safeguards
- Detailed investigation required
Requirements on a user of Anti-dumping

• Legal and institutional framework
• Notify and implement domestic laws in conformity with Article VI of GATT and the ADA
• Investigating authority
• Judicial review
Anti-dumping action: Legal basis

• Specific action against dumping is required to be taken in accordance with Article VI of GATT 1994 and the Anti-Dumping Agreement
1. The contracting parties recognize that dumping, by which products of one country are introduced into the commerce of another country at less than the normal value of the products, is to be condemned if it causes or threatens material injury to an established industry in the territory of a contracting party or materially retards the establishment of a domestic industry. For the purposes of this Article, a product is to be considered as being introduced into the commerce of an importing country at less than its normal value, if the price of the product exported from one country to another (a) is less than the comparable price, in the ordinary course of trade, for the like product when destined for consumption in the exporting country, or, (b) in the absence of such domestic price, is less than either (i) the highest comparable price for the like product for export to any third country in the ordinary course of trade, or (ii) the cost of production of the product in the country of origin plus a reasonable addition for selling cost and profit.

Due allowance shall be made in each case for differences in conditions and terms of sale, for differences in taxation, and for other differences affecting price comparability.
Substantive requirements

• Dumping
• Injury
• Causal link
Anti-dumping Agreement: Essential Features

- Deals with the price behaviour of exporters and not the exporting country as a whole
- Can have separate anti-dumping duty for each exporter
What is dumping

• If the export price of the product from the country of export is less than its normal value in the ordinary course of trade
• Dumping *per se* is not objectionable
• Injurious dumping has been condemned
• Dumping Margin = \( \frac{\text{Normal Value} - \text{Export Price}}{\text{Export Price}} \)
Initiation of investigation

• Objective - to determine the existence, degree and effect of alleged dumping
• Usually initiated at the written request by or on behalf of the domestic industry
• Application can be made by associations
• In special circumstances suo moto initiation possible without written request from domestic industry
• If there is insufficient prima facie evidence that injurious dumping has taken place, application rejected, otherwise investigation initiated against the specified product
Initiation- obligations on investigating authority I

- Standing requirement – Article 5.4
  - 25 % test and 50% test
  - Those supporting the petition must account for at least 25% of the total domestic production of the product concerned
  - Those supporting the petition must account for at least 50 % of the production in respect of those expressing an opinion on the petition
- Suo moto initiation also possible.
Initiation- obligations on domestic industry

• To meet standing requirement (Art 5.4)
• To present **sufficient evidence** in the application on dumping injury and causal link – mere assertion, conjecture or allegation not adequate (Art 5.2)
Petition Proforma – Domestic Industry

- Description of product under consideration (PUC)
- Details of the imports of PUC
- Details of the exporters and importers of the product
- Indian industry profile
- Evidence of dumping
- Evidence of injury
  - Changes in market share
  - Decline in production of petitioners
  - Decline in capacity utilization
  - Evidence of price erosion, price under cutting
  - Details of profitability
Initiation of investigation

- Notify the exporting country before initiation (Art 5.5)
- **Provide** full text of the written application to the known exporters and to the authorities of the exporting Member as soon as the investigation has been initiated (Art 6.1.3)
- Upon request, the text of the application must be **made available** to other interested parties (Art 6.1.3)
- Questionnaires sent to exporters, importers, domestic industry and other interested parties. Exporters or foreign producers must be given at least 30 days to reply (Art 6.1.1)
- NCV of submissions to be made available to interested parties (Art 6.5)
Questionnaire response - exporters

- Domestic sales and its price structure
- Customer-wise export sales to India
- Sales price structure for exports to India
- Sales price structure for exports to other countries
- Statement of raw material consumption
- Allocation and apportionment of expenditure
- Statement of cost of production
Rights of interested parties

• Throughout the investigation all interested parties shall have a full opportunity for the defence of their interests
• NCV of written submissions to be made available
• Entitled to be heard
• Entitled to have access to public file
• May submit comments
Data Analysis by IA

• Exporters’ data analysed to determine whether dumping exists
  ➢ Determining export price
  ➢ Determining normal value

• Domestic industry data analysed to determine whether injury caused due to dumping
Normal Value

**RULE:** Domestic price of the *like product* in the country of exports

Two exceptions

- Export price to a third country
- Constructed normal value
Export Price

Price paid by importers

Exception

• Constructed export price
• If export price unreliable because of association or compensatory arrangement between exporter and importer then resort to constructed export price at which imported products are first resold to an independent buyer.
Fair Comparison Between NV and EP

• Same level of trade
• ...as nearly as possible the same time
• Make suitable adjustments for
  ➢ physical difference
  ➢ channels of sale
  ➢ taxation
Adjustments: Illustrations

• Ex-factory price for NV = Gross selling price – (freight and insurance + selling expenses + discounts and rebates + taxes not borne by exports + credit expenses)

• Ex-factory Export price = Gross export price – (freight and insurance + selling expenses + discounts and rebates + credit expenses) + export subsidies

• Some adjustments can be made on either NV or EP
## Dumping Margin Calculation

\[
\text{Dumping Margin} = \frac{(\text{Adjusted Normal Value} - \text{Adjusted Export Price})}{\text{Ad. Export Price}} \times 100
\]

<table>
<thead>
<tr>
<th>Normal Value</th>
<th>Export Price</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Home Market Price</td>
<td>- Export prices to an unaffiliated importer</td>
</tr>
<tr>
<td>- Constructed Normal Value</td>
<td>- Constructed Export Price</td>
</tr>
<tr>
<td>Production Cost + Administrative Cost + Profit (-Loss)</td>
<td>Price to the first unaffiliated customer</td>
</tr>
<tr>
<td>or</td>
<td>or</td>
</tr>
<tr>
<td>- Export price to third country</td>
<td>- Price determined on a reasonable basis by investigating authority</td>
</tr>
</tbody>
</table>

- Price Adjustments (to obtain “ex-factory prices”)
De minimis provisions

- Anti-dumping investigations to be terminated if
  - Dumping margin is less than 2% or
  - Volume of dumped imports from particular country is less than 3% subject to 7% cumulation.
Determination of Injury

– Material injury

– Threat of material injury: no current injury but it is likely to occur...

– Material retardation

– All producers or major proportion of the domestic industry

• Objective examination
• Positive evidence
Injury determination

• Effect of the dumped imports on prices in the domestic market for the like product
  - Price under-cutting
  - Price depression
  - Prevent price increases

• Consequent impact of the dumped imports on domestic producers of such products
  - Evaluation of 15 factors
Injury factors to be considered

• 15 factors have been specified

• All these factors to be evaluated including

  ➢ Having a bearing on state of industry- actual and potential decline in sales, profits, output, market share, productivity, ROI etc

  ➢ Affecting domestic prices

  ➢ Magnitude of margin of dumping

  ➢ Actual and potential negative effects on cash flows, stock, employment, wages etc.
Causal link between dumping and injury

• Dumped imports are causing injury
• The causal link to be demonstrated
• Any injury caused by known factors other than dumping must not be attributed to dumped imports
• Relevant factors:
  ➢ Contraction in demand
  ➢ Developments in technology
  ➢ Export performance
Provisional Measures

• Applied if preliminary affirmative determination has been made of dumping and consequent causal injury to a domestic industry
• Necessary to prevent injury being caused during investigations
• Not applied sooner than 60 days after initiation of investigation
• Publication of a notice required
Price undertakings

• Proceedings may be suspended or terminated without imposition of provisional measures or anti-dumping duties
• Exporter has to give voluntary undertaking to revise its prices or to cease exports at dumped prices.
• Authorities must be satisfied that injurious effect of the dumping is eliminated.
Verification visits

- On-the-spot verification of exporters and domestic industry normally undertaken
- Objective is to verify the information submitted or to obtain further details
- Explicit agreement of the firms in exporting country needed prior to verification visit
- Prior to visit firm should be informed of the general nature of information to be verified and any further information to be provided
Disclosure

• Before a final determination is made the investigating authority is required to inform all the interested parties of the essential facts under consideration which the basis of the final decision

• Interested parties must be given sufficient time to defend their interests

• Analysis of comments by interested parties necessary
Time-limit

18 months from initiation
Imposition and collection of anti-dumping duties

• Anti-dumping duties to be imposed shall be to the full margin of dumping or less if it is adequate to remove injury.

• Duties imposed and collected on non-discriminatory basis on such product from all sources found to be dumped and causing injury (exception undertaking)

• Duty levied mainly on prospective basis
Public Notice and Explanation

• All relevant information which have led to imposition of the measure
  ➢ on matters of fact and law
  ➢ reasons

• Reasons for acceptance/ rejection of relevant arguments

• Basis for decisions
Duration and Review of measures

• Duty in force only as long as necessary to counteract dumping causing injury
• Review after a reasonable period of time
• Duties to terminate before 5 years unless in the sunset review a conclusion that expiry of duty would lead to continuation or recurrence of dumping and injury
Misuse/ abuse of anti-dumping duty: Remedies available

• Requirement of a mechanism for judicial review of final anti-dumping duty in the importing country

• Possibility of raising a dispute under WTO’s Dispute Settlement Mechanism
Different systems of duty assessment

- Prospective system: easier to administer
- Retrospective system: more effective in addressing dumping
WTO Committee on A D practices

• Meets twice a year
• All preliminary and final action to be notified to the committee
• Members to submit six monthly reports on anti dumping action
Thank You
