

■	<b>Overview.....</b>	<b>13</b>
■	<b>Chapter 1: The challenge: sustainable road transport.....</b>	<b>15</b>
	What is "sustainable road transport".....	16
	What are the costs of transport?.....	17
	What are the policy options?.....	19
	How can Economic Instruments contribute to sustainable road transport? .....	21
	Which types of Economic Instruments exist?.....	22
	Why should Economic Instruments be used? .....	24
	What are the limits to Economic Instruments?.....	25
■	<b>Chapter 2: Getting started: putting theory into practice ...</b>	<b>29</b>
	Step 1: Gather people together and set economic, environmental and social objectives! .....	30
	Step 2: Conceptualise a comprehensive road transport strategy! ....	33
	Step 3: Evaluate the feasibility of Economic Instruments!.....	37
	Step 4: Choose the appropriate Economic Instrument and its specifications! .....	40
	Step 5: Determine institutional requirements for implementation and control!.....	42
	Step 6: Determine revenue allocation!.....	44
	Step 7: Determine adjustment period and schedule for implementation! .....	47
	Step 8: Raise public awareness and acceptance! .....	48
■	<b>Chapter 3: The national framework: laying the basis for sustainable road transport.....</b>	<b>51</b>
■	Vehicle Taxation .....	52
	Vehicle taxation as a policy instrument .....	52
	International experience: Vehicle taxation in the world .....	56
	Best practice case: Vehicle taxation in Germany .....	58
	Best practice case: Transition to "Clean Cars" in the Netherlands..	61

## Contents

---

■ Fuel taxation.....	63
Fuel taxation as a policy instrument.....	63
International experience: Fuel taxation in the world.....	68
Best practice case: High fuel taxation in Germany .....	72
Experiences with the Environmental Trust Fund in Mexico .....	76
■ Road pricing.....	79
Road pricing as a policy instrument .....	79
Best practice case: Road pricing of highways, and toll roads in France.....	84
■ <b>Chapter 4: The provincial and urban level:     meeting the local needs .....</b>	<b>87</b>
■ Surcharges on national/federal measures .....	88
Surcharges as a policy instrument .....	88
Best practice case: State surcharges on fuel taxation in the United States .....	89
■ Parking fees .....	91
Parking fees as a policy instrument.....	91
International experience with parking policies.....	96
■ Urban road and congestion pricing.....	98
Urban road and congestion pricing as a policy instrument .....	98
Best practice case: City toll ring in Trondheim, Norway.....	103
Best practice case: Congestion pricing in Seoul, Republic of Korea .....	106
Best practice case: Mobility concept of the Land Transport Authority in Singapore.....	108
■ <b>Chapter 5: Conclusions and     general recommendations .....</b>	<b>117</b>
■ <b>References .....</b>	<b>123</b>
